

FAASTeam Western Pacific presents:

Meet the Mechanic: Respecting Your Engine- POSTPONED

Part of our Meet the Mechanic series of discussion groups, where experienced aircraft mechanics share knowledge and expertise with the general aviation community.

Here is your chance to get answers to all those burning questions you have about how to treat your engine better! A mechanic from Suburban Air Corporation will lead this lively and interactive seminar. We will start with a discussion of:

- leaning the engine: how, when and why
- temperature management
- mastering the hot start (as well as the cold start)
- oil changes
- the fine art of trouble shooting and diagnosing mechanical irregularities

The session ends with a Q&A, so bring those common and uncommon questions.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.
